Dear Hiring Manager,

I am writing to express my enthusiasm for the Full Stack Web Developer position. As a recent graduate with a degree in [B.tech in Computer Science & engineering] from [United Institute of Technology], I have developed a strong foundation in both front-end and back-end technologies, and I am eager to apply my skills in a dynamic and innovative environment.

During my studies, I gained hands-on experience in web development through various projects, where I utilized HTML, CSS, and JavaScript for front-end development and Node.js and Express for back-end services. One of my key projects involved creating a responsive web application that allowed users to manage their tasks effectively. This experience not only honed my technical skills but also taught me the importance of user experience and collaborative problem-solving.

I am particularly drawn to development company and software development company because of the deep knowledge in the field and want to apply my knowledge practically.I am excited about the possibility of contributing my skills to your team.While I may be at the beginning of my professional journey, I bring a passion for learning and a proactive approach to challenges. I am familiar with version control systems like Git, and I am committed to staying updated with the latest industry trends and technologies.I would be thrilled to discuss how my background, skills, and enthusiasm align with the goals of the company. Thank you for considering my application. I look forward to the opportunity to speak with you further.

Sincerely,

Aryan Singh
